MARCH 1998

205 Factors influencing the effectiveness of Split Set friction stabilizer bolts
PB. Tomory, M.W Grabinsky, J.H. Curran and J.Carvalho

215 The challenges and opportunities of ISO 9000 registration: “Your customers are calling”
S.E. Stanley

221 Zirconium and hafnium separation without waste generation
A.B.V da Silva, Jr. and LA. Diştin

225 In-situ investigations on shearer drum design
O.Z. Hekimoglu and B. Tiryaki

228 Parameters for feeder selection and installation
J.W Potma

APRIL 1998

63 Simulation of mining venture risks resolution in Canadian markets
S. Frimpong and J.M. Whiting

69 Valuing management flexibility. A basis to compare the standard DCF and MAP valuation frameworks
M. Samis and R. Poulin

75 Magnola: A novel commercial process for the primary production of magnesium
P Ficara, E. Chin, T. Walker, D. Laroche, E. Palumbo, C. Celik and M. Avedesian

81 Smoothing effect, conditional bias and recoverable reserves
G. Pan

87 Methodology for developing a stakeholder based external affairs strategy
K.L. Aringer

94 The behaviour of zinc, cadmium, thallium, tin and selenium during ferrihydrite precipitation from sulphate media
J.M. Zinck and J.E. Dutrizac

102 Efficient metal production aims to reduce CO2 emissions
E. Es-Sadiqi

MAY 1998

43 A geomechanical study for a shaft wall rehabilitation program
S. Nickson, D. Sprott, WF Bawden and A. Coulson

54 Elaboration d’un modèle de prediction des contraintes in-situ dans la region de la faille de Cadillac

59 Effects of geology and mine layout on roof caving in Phalen Colliery
D.H. Steve Zou and R. MacDonald

65 Mining under backfill
G.M.M. Ley CM. Steed, D. Bronkhorst and R. Gustas

76 Keys to successful monitoring of evaporite and coal mines
E. De Souza

APRIL 1998

261 In situ strength criteria for tunnel design in highly-stressed rock masses
R. S. Read, N. A. Chandler and E. J. Dzik

279 Petrophysics studies of sedimentary rocks from a cross-hole seismic test site
M. S. King and M. Shams-Khanshir

291 Measurement of the intrinsic process zone in rock using acoustic emission
W. K. Zietlow and J. F. Labuz

301 Ultimate bearing capacity of an anisotropic discontinuous rock mass. Part I: Basic modes of failure
A. Serrano and C. Olalla

325 Ultimate bearing capacity of an anisotropic discontinuous rock mass. Part II: Determination procedure
A. Serrano and C. Olalla

349 Crack pattern evolution and a fractal damage constitutive model for rock
Yonghong Zhao

367 Experimental and numerical evaluation of stress redistribution in thick-walled rocksalt cylinders
Maria Helena Leite, Denis E. Gill and Robert Corthesy

MAY 1998

Special Issue NARMS 98

385 Mine Design and Ground control, Instrumentation

403 Research and Development

427 Numerical Modelling A

449 States of Stresses

465 Numerical Modelling B

477 Ground Support
Fracture and Discontinuity, Mechanical Breakage of Rocks

Petroleum Rock Mechanics

Storage for Petroleum

Boring Technology

Storage for Disposal

Application of Geophysical Techniques

Rock Mechanics Testing

Dams and Hydroelectric Projects, Seepage and Grouting

Yucca Mountain Nuclear Waste Repository

Rock Slope Stability

Underground Excavation, Tunnelling, Foundations

W1-Mine Design and Ground and Ground Control

Advanced monitoring and analysis of microseismic activity as an aid to mining at Brunswick Mines Paper No. 073
B. P. Simser, P. P. Andrieux, D. A. Peterson, T. A. Mac Donald and J. M. Alcott

Seismic response of rock mass to blasting and rockburst potential Paper No. 038
M. Eneva, A. J. Mendecki and G. van Aswegen

Instrumentation and backfill performance in a narrow vein gold mine Paper No. 106
F. Hassani, K. Fotoohi and C. Doucet

Volume of ground motion and seismic hazard Paper No. 037
M. Eneva, G. van Aswegen and A. J. Mendecki

Importance of the presence of an auditor specialized in rock mechanics in quality assurance audits of civil works in rock Paper No. 012
D. Y. Santillán

Stochastic keyblock analysis for stope support design Paper No. 122
G. S. Esterhuizen and K. A. Ackermann

Strength of support pillars and their foundations in hard rock tabular mining Paper No. 119
M. U. Ozbay and J. A. Ryder

Large-scale surface disturbances resulting from underground mass mining Paper No. 025
J. F. Lupo

Evaluation of pullout resistance and direct-shear strength of grouted fiberglass cable bolts Paper No. 066
S. M. Miller and D. C. Ward

Longwall mining through a graben with anomalous stresses at the Deer Creek mine Paper No. 022

WIR Research and Development

Cement grouts in theory and reinforcement practice Paper No. 077
A. G. Thompson and C. R. Windsor

Preliminary study for determining water curtain design factor by optimization technique in underground energy storage Paper No. 101
W. Yang and D. S. Kim

Limestone rocks of the Yucatan Peninsula. Description of the lithology and physical properties based on the results of exploration, investigation and laboratory tests Paper No. 132
L. Espinosa, M. Cerón and Y. A. Sulub

Earth crust mechanics Paper No. 014
A. A. Bello-Maldonado

Maximum temperature memory in sandstone and mudstone observed with acoustic emission and ultrasonic measurements Paper No. 099
W. M. Zaberek, B. Zogala, R. Dubiel and J. Pierwola

Development of a new peak shear strength criterion for anisotropic rock joints Paper No. 040
P. H. S. W. Kulatilake, J. Um B. B. Panda and N. Nghiern

A new failure criterion for transversely isotropic rocks Paper No. 130
O. Cazacu, N. D. Cristescu and J. F. Shao

Constitutive behavior of reconsolidating crushed salt Paper No. 029
G. D. Callahan, K. D. Mellegard and F. D. Hansen

Investigation of the influence of the clay seams in the vicinity of an underground excavation in rock salt Paper No. 054
S. Kwon and J. W. Wilson

Use of block models for longwall shield capacity and determinations Paper No. 044
L. J. Gilbride, A. M. Richardson and J. F. T. Agapito

State of Stresses

Reinforcement systems mechanics, design, installation, testing, monitoring and modelling Paper No. 076
C. R. Windsor and A. G. Thompson

Progressive failure of a porous limestone under cyclic loading revealed by ultrasonic attenuation Paper No. 072
J. F. Courvreur and J. F. Thimus

Tensile fracturing of stiff rock layers under triaxial compressive stress states Paper No. 070
Z. Reches

In situ stress determination using AE and DRA techniques Paper No. 102
M. Seto, M. Utagawa, K. Katsuyama and T. Kiyama

Influence of fluid viscosity on hydraulically induced crack geometry Paper No. 030
T. Ishida, Q. Chen, Y. Mizuta and J. C. Roegiers

Temperature effects in underground excavations and its importance in Mexico Paper No. 021
I. L. Olmos

Investigation of the shear stress distribution around an excavation in rock salt Paper No. 055
S. Kwon and J. W. Wilson

MADENCİLİK/HAZİRAN 1998
Progress on the development of a three-dimensional capability for simulating large-scale complex geologic processes
Paper No. 083
J. Guadalupe Argüello, C. M. Stone and A. F. Fossum

Using three dimensional structural simulations to study the interactions of multiple excavations in salt Paper No. 084
E. L. Hoffman and R. L. Elgartner

Micromechanics and homogenization techniques for analyzing the continuum damage of rock salt Paper No. 041

Modeling flow in heterogeneous dual-porosity media Paper No. 057
M. Zaman, M. Bai, J. Cao, and J.-C. Roegiers

Correlation between rock permeability and stress induced anisotropy Paper No. 062.
M. Bai, F. Meng and J.-C. Roegiers

Computer simulation of open pit bench blasting in jointed rock mass Paper No. 121
Z. Jia, G. Chen and S. Huang

Linear-support design for underground excavations in rock Paper No. 133
C. A. Lauro and A. P. Assis

Field testing of a yielding support system Paper No. 087
E. De Souza, P. Mottahed and M. Molavi

The tensometric rockbolt for stress measuring Paper No. 113
R. Snupárek

Support and strata interaction in longwall faces Paper No. 049
R. Özel and E. Ünal

Selection criteria for shield supports Paper No. 050
E. Ünal and R Özel

Ground control and design of deep mine openings Paper No. 089
B. Amusin

A neural approach, to sand production prediction in wells Paper No. 060
M. Kanj and J.-C. Roegiers

Optimal delineation of joint sets using a fuzzy clustering algorithm Paper No. 136
R. E. Hammah and J. H. Curran

Modelling of blasthole expansion and explosive gas pressurization in jointed media Paper No. 048
A. Mortazavi and P. D. Katsabanis

Quantifying joint roughness using artificial neural networks Paper No. 093
J. S. Lessard and J. Hadjigeorgiou

On the natural collapse of fractures in rocks with low fluid Paper No. 019
M. C. S. Arriaga and F. S. Verduzco

Effects of anisotropics on fluid flow in deformable fractured media Paper No. 056
M. Bai, Y. Abouleimam, S. Abseek M. Chen and J.-C. Roegiers

Matching simulated fracture data with field measurements using joint intensity Paper No. 010
J. Ehlen

Laboratory investigation of bit wear in water jet assisted cutting of a continuous miner Paper No. 018 A. W. Khair and V. B. Achanti

A comparison of eight methods for measuring grain and boundary cracking in heated quartzite samples Paper No. 068
J. Kerneny and Z. Zomeni

Derivation of fracture spatial pattern parameters from borehole data Paper No. 134
W. Dershowitz, P. La Pointe and T. Cladouhos

Three-dimensional numerical simulation of slippage along natural fractures induced by earthquakes Paper No. 116
P. R. La Pointe, P. C. Wallmann, T. Cladouhos, A. L. Thomas and S. Follin

Modeling notch-formation mechanisms in the URL mine-by test tunnel using bonded assemblies of circular particles Paper No. 067
D. O. Poyondy and P. A. Cundall

Reexamination of fault angles predicted by shear localization theory Paper No. 088
J. W. Rudnicki and W. A. Olsson

Reduction of hydraulic diffusivity during reactive flow in clays and shales Paper No. 036 M. B. Geilikman and M. B. Dusseault

Assessment of some semi-analytical models for nonlinear modelling of borehole stresses Paper No. 034
P. A. Nawrocki, M. B. Dusseault, R. K. Bratli and G. Xu

Evaluation of openhole cavity completion technique in coalbed methane reservoirs Paper No. 074
H. H. Vaziri and I. D. Palmer

A porosity-gradient controlled simulation model for solids production Paper No. 104 L. Zhang and M. B. Dusseault

Centrifuge tests to identify mode of sand production and its effect on production Paper No. 075
H. H. Vaziri, S. Thallak and R. Phillips

Solids production prediction in a highly heterogeneous carbonate formation Paper No. 100
A. Onaisi and D. Richard

Stability of perforations near hydraulic fractures Paper No. 091
P. Papanastasiou and A. Zervas

Chalk production and effects of water weakening Paper No. 110
E. Papamichos

An erosion-mechanical model for sand production rate prediction Paper No. 090
E. Papamichos and M. Stavropoulou
616 Strength characterization of a typical swelling shale Paper No. 126
J. C. Fooks and M. B. Dusseault

617 Spherical hydrostatic compaction-creep testing equipment Paper No. 128
B. Davidson, B. Lemieux, D. Hirst, J. Fooks and M. Dusseault

618 Application of the Miniature Seismic Reflection (MSR) system for monitoring dynamic changes in mechanical properties of rocks Paper No. 039
A. Sadri, F. P. Hassani and M. Momayez

620 The influence of in-situ stress on the tensile fracture pattern induced by hoop tests Paper No. 004
H. D. Park

621 Breakage resistance of a granite using new testing devices Paper No. 002
M. P. Luong and N. Hoteit

623 Spherically isotropic spheres subject to diametral point load test: analytic solutions Paper No. 006
X. X. Wei and K. T. Chau

625 Evaluation of the macroscopic deformation characteristics of rock mass obtained by rock tests and measurements Paper No. 094
S. Hibino and M. Kamijo

626 Rock deformation in a multiaxial compression state Paper No. 003
E. Gaziev and J. Alberro

628 An experimental study on the size effect in block punch test: analytic solutions Paper No. 008
R. Ulusay and C. Gokceoglu.

630 Intact rock classification based on time-dependent deformational properties Paper No. 016
A. Ozgenoglu

631 Capillary forces: how important are the effects on shale breakage in laboratory testing? Paper No. 064
H. Santos, A. Diek and J.-C. Roegiers

633 Physical and mechanical properties of degraded waste surrogate material Paper No. 081 F. D. Hansen and K. D. Melleward

634 Solutions for hollow cylinders in transversely isotropic porous materials Paper No. 1 17 L. Cui, Y. Abousleiman and J.-C. Roegiers

637 Permeability of natural rock salt from the Waste Isolation Pilot Plant (WIPP) during damage evolution and healing Paper No. 028
T. W. Pfeifle and L. D. Hurtado

641 Geology and tectonics of West Panama and their relation with the design of a hydroelectric project Paper No. 051
R. Ch. Riva Palacio and E. V. Hernandez Lopez

644 In situ stress measurements in the pre-excavation design stage of the Serra da Mesa hydroelectric project, Brazil Paper No. 124 B. C. Haimson

F13- Yucca Mountain Nuclear Waste Repository

649 Post-test comparison of thermal-mechanical measurements vs. analyses for the in-situ single heater test, Yucca Mountain, Nevada Paper No. 056
S. R. Sobolik, R. E. Finley and S. Ballard

650 Post-test comparison of thermal-hydrologic measurements and numerical predictions for the in-situ single heater test, Yucca Mountain, Nevada Paper No. 071
S. Ballard, N. D. Francis, S. R. Sobolik and R. E. Finley

652 Site-specific thermal and mechanical property characterizations of in-situ thermal test areas at Yucca Mountain, Nevada Paper No. 078
N. S. Brodsky and G. Barker

654 The Yucca Mountain project drift scale test Paper No. 079

F21- Rock Slope Stability

661 Optimization of rock slopes using reliability concepts Paper No. 015
I.-M. Lee and M.-J. Lee

662 Rockfall problems in Hong Kong and some new experimental results for coefficients of restitution Paper No. 007
K. T. Chau, R. H. C. Wong and C. F. Lee

664 Stability analysis and reinforcement system design in a progressively failed steep rock slope by the distinct element method Paper No. 031
T. Esaki, Y. Jiang, T. N. Bhattachari, A. Nozaki and T. Mizokami

667 Mechanism of Pleistocene rock slides near Pittsburgh, Pennsylvania Paper No. 032.
J. V. Hamel

F22- Underground Excavation, Tunnelling, Foundations

673 Practical use of rock mass classification for cavern and tunnel support Paper No. 131
K. Honisch and K.-H. Nagel

674 Control system for tunnel boring machines (TBM): a first and investigation towards a hybrid control system Paper No. 120
A. H. Zettler, R. Poisel, D. Lakovits and W. Kastner

675 The REX expert system: a new alternative for rock excavation design Paper No. 023
M. A. Tapa, M. A. Valverde, B. Amadei and H. Madrigal

677 Transient poro-plastic response around a cylindrical cavity Paper No. 080
L. Benamar and G. Rousset

678 MITRA: a micro-tunneling procedure for plastic clay Paper No. 052
B. Bazargan-Sabet

679 Water-conveying tunnel: third phase Paper No. 020

MADENCİLİK / HAZİRAN 1998

61
Growing at a level of around 4%, with other more specialised grades showing a rate of almost 10% per annum, the ATH market is as healthy as ever. This article reviews production and markets in Asia, North America, and Europe.

Refined ideas
Fluorspar purity the goal for Minera Las Cuevas
This profile outlines Mexican fluorspar producer Minera Las Cuevas' activities.

European acidspat
An overview of production
Peter Huxtable of Laporte Minerals places the European acidspat industry in a global context.

Perlite & vermiculite
Crudely speaking, the potential is good
The late Prof. Israel Lin kindly contributed this review of specific utilisation of crude, unexpanded perlite and vermiculite.
